NOTICE OF APPLICATION TO APPROPRIATE PUBLIC WATERS
TAKE NOTICE:

That Bryon Green & Colleen O'Keane of Oregon City, Oregon on December 4, 1998, under Application No. S2-29814 filed for a permit to appropriate public waters, subject to existing rights, from an unnamed spring in the amount of .01 cubic feet per second as needed year round each year for single domestic supply and irrigation during the irrigation season. The source of the appropriation is located within Section 11, T. 13 N., R. 7 W.W.M., of Pacific County, Washington.

Protests or objections to approval of this application must include a detailed statement of the basis for objections and are subject to public disclosure. Indicate in your letter if you prefer to remain anonymous. Protests must be accompanied by a two dollar (\$2.00) recording fee and filed with the Department of Ecology, at the address shown below, within thirty (30) days from: August 27, 2003.

15527 S Highland Rd
Oregon City OR 97045

Dear Mr. Green & Ms. Okeane:

Re: Water Right Application No. S2-29814

We have received your application for appropriation of water and it has been assigned the number referenced above. If you contact us in the future regarding this application, it will help us serve you more quickly if you refer to this application number.

Please complete the following two steps:

1. Enclosed is a notice of your application, which must be published once a week for two consecutive weeks in a newspaper published in **Pacific** County. The newspaper should have general circulation in the locality where the water is to be diverted and used, and must be qualified as a legal newspaper. Publishing the notice in a remote part of the county, when not necessary, may be cause for you to be required to republish the notice in a designated newspaper. The enclosed newspaper list may help you select an appropriate newspaper for the area.

Publication should start within 30 days from the date of this letter.

To assure accuracy, it is your responsibility to check the notice carefully before having it published. If you find an error, please contact this office for correction and/or resolution. If we later find an error in your public notice, you will be required to re-publish an amended notice at your expense.

2. After publication, the publishing newspaper should provide you with a notarized original Affidavit of Publication, which should be forwarded to our office as soon as possible. Please do not send a photocopy of the affidavit.

If you have any questions or concerns about any of this information, please call (360) 407-0240. Thank you for your attention to this matter.

Sincerely,

A handwritten signature in cursive script, reading "Sheri Carroll", is written over the printed name.

STATE OF WASHINGTON
DEPARTMENT OF ECOLOGY

**INSTRUCTIONS FOR ASSIGNMENT OF APPLICATION OR PERMIT TO APPROPRIATE
OR STORE WATER**

**A NON-REFUNDABLE \$5.00 FEE MUST ACCOMPANY THE FILING OF THIS
ASSIGNMENT.**

MAKE CHECKS OR MONEY ORDERS PAYABLE TO THE DEPARTMENT OF ECOLOGY.

Introduction:

A water right application requests that a proposed beneficial water use be authorized, while a permit grants authority to develop a beneficial water use. A water right is established if water is put to beneficial water use(s) as authorized by a permit. A water right, once established, attaches to the land upon which it is legally used. It is not necessary to assign a water right certificate or a water right claim. It is required by statute that an assignment be filed for applications and permits (90.03.310 RCW).

To remain a viable application or permit, the person(s) owning it must maintain the ability to develop a water use(s) upon the property identified as the place of water use. Normally only the property owner, a lessee, or a legally recognized water system has authority to develop a water use upon a parcel of land.

An assignment of an application or permit is not valid until filed with the Department of Ecology. An assignment is made whenever it is desired to transfer all or part of the responsibility and/or interest in an application or a permit to appropriate or store water. Normally an assignment is made if the application/permit holder(s) sells the place water is to be used to another person.

The person(s) receiving the application/permit may be required to provide additional information prior to acceptance of the assignment. For example, information may be requested showing that the assignment is in compliance with the provisions of the Family Farm Water Act, Chapter 90.66 RCW.

Instructions: Complete the Assignment Form in ink.

Part 1. The name(s) of the holder of the application or permit must be identified. Secondly, the application/permit number given by the Department of Ecology must be identified. Identify the water source associated with the application/permit. The water source is the river stream, spring, well or other features from which water is obtained. Identify the name(s) of the person(s) being assigned the application or permit. Indicated whether the entire application/permit or only a portion is being assigned. If only a portion is being assigned, you must prepare an attachment fully describing what water quantities, purpose(s) of use, and acreage are being assigned. An attachment may be used to complete any information required by this form.

Part 2. Provide a reason why the assignment is being made. Understanding the purpose of the assignment will assist us in evaluating whether an assignment is appropriate and help us to provide advice to the new application/permit holder. For example, you could enter "sale of property" if that is the case.

Part 3. The place of use to be effected by the assignment must be identified. Providing the specific place of use information will eliminate errors that could be made in the administration of the application/permit.

Part 4. Indicate whether or not the assignment will have impact upon the timing of the development schedule as stated within the application/permit. If there will be any delay, include a statement proposing a new development schedule.

Part 5. The holder(s) of the application/permit and the person(s) to which it is being assigned must provide their signatures and addresses. The person(s) being assigned the application/permit must also provide a telephone number, if available. The addresses provided on the assignment form will be assumed to supercede any addresses already contained within the application/permit record. The formal place of contact will be considered the address and telephone number provided of the person(s) being assigned the application/permit upon acceptance of the assignment.

Notary Signature Block: The signature of the current holder of the application/permit must be notarized.

Re: Water Right Application No. S2-29814

This letter is to acknowledge that the Washington State Department of Ecology received your water right application. We have assigned your application the number indicated above. Please include this number in future correspondence regarding your application with the Department of Ecology.

When we begin actively evaluating applications in your area, we will prepare a public notice and send it to you with publication instructions. It will be sometime before we are able to begin working in your area. In the meantime, please notify Ecology of changes such as address, property ownership, or variations in your proposed water use plans.

The availability of water in Washington state is a serious problem. Much of the water in our state has already been appropriated. The competition for water has escalated with our state's increasing population, conflicting water policy issues, and grave declines in salmon and other fish populations. A new watershed management law brings us a step closer to addressing some of these issues. It sets into motion a locally based process to address water quantity, quality, and habitat issues. Watershed management will help meet challenges for getting water to people, industries, farms, and fish.

In some areas of the state, we are continuing to evaluate applications within watersheds where we have previously gathered information and completed watershed assessments. We are also continuing to process water right permit or change applications that are intended to address public health and safety emergencies, the natural environment, or are for nonconsumptive withdrawals. All other applications are grouped by watershed and processed according to the date of submittal, and when we have enough information and staff resources to make decisions.

If you would like further information on your application, please contact the Southwest Regional Office at (360) 407-0240.

Sincerely,

J. Mike Harris

RECEIVED December 2, 1998

Dear Don Davidson

'98 DEC -4 AIO :40

I would like to apply for water rights, on a spring that is located on state land, adjacent to our property, on Mill Creek Rd. in Pacific County. I have filled out the application and attached a legal description of our property, a copy of a tax assessors map of our property, and a photo-copy of a portion of a 7.5 minute U.S.G.S. map of the area that has the location of the spring and our property marked on it.

To my knowledge no one has water rights on this spring, or has applied for them. I would like to be informed, if there are all ready water rights on this spring, or if somebody has already applied for them.

Thank you for your time and please feel free to contact me, at (503) 286-0569 if you have any questions.

Sincerely

Joseph Maresch
